

appropos health™

Evidence based. Reward driven. Clinically integrated.

We aim to reduce alcohol use through technology that expands access to care. Our solution equips providers with real-time patient insights to help manage them more efficiently and deliver personalized support.

AUD IN THE U.S.¹

- 28.9 million are affected by AUD
- Only 2.3 million (7.9%) receive treatment¹
- Up to 20 million could be treated
- Patients often do not complete current treatment options due to stigma

WHAT APPROPOS HEALTH DOES

- **Automates** contingency management (CM), a validated intervention with real-time biometric verification of alcohol use
- **Analyzes** patient drinking behavior
- **Integrates** with existing clinical workflows
- **Eliminates** common barriers to care with a fully-remote, scalable digital intervention

FEATURES & BENEFITS

Remote and discreet verification of alcohol use

Daily CM rewards automatically issued to users

Proprietary risk score provided for clinician review

Automated clinician workflow and real-time view of patient progress

Payors can receive documented results of patient abstinence

WHO WE SERVE

PROVIDERS

- **Enrolls** patients directly via EHR portal - integrating them into your workflow
- **Monitors** patient activity and compliance for you - intervening early with AI-driven risk scoring
- **Provides insights** into drinking behavior to inform a personalized plan of care

PATIENTS

- **Inclusive** of all populations, including rural and underserved communities
- **Remote access** using smartphone app and breathalyzer device
- **Easy to use** - requiring as little as 10 min per day
- **Rewards** earned for non-drinking days

PAYORS

- **Ensures** scalable, verifiable patient outcomes
- **Delivers** a secure audit trail of patient compliance
- **Calculates total cost** based on patient success (program flat fee + variable rewards)

OUR STATUS

Appropos Health has recently completed primary data collection from an NIH-sponsored clinical trial. Peer-reviewed results are expected early in 2026. The preliminary results indicate that over the 12-week program, the Appropos Health intervention group:

- 1. Had a greater number of alcohol-free days vs. the control group**
- 2. Had fewer number of days with reported BAC levels exceeding 0.08**

We are confident our current trial will be statistically significant and look forward to sharing the complete study results with you.

To request details on our initial development, as well as references on contingency management effectiveness, please contact us.

COLLABORATE WITH US

WE'RE SEEKING PARTNERS WHO:

- **Manage patients or conduct research to reduce alcohol consumption**
- **Can enroll patients with smartphones into our 12-week program (requires samples 3 times a day)**
- **Offer EHR integration**
- **Seek efficient tools to deliver care at a lower cost than traditional therapies**

IN RETURN, WE PROVIDE:

- **A fully-managed digital platform**
- **An efficient method for patient enrollment and engagement which documents reduction of alcohol use**
- **Fixed and variable cost options under \$1400 per patient**
 - Fixed fee plus variable rewards
 - Fixed-cost risk-sharing approach

ABOUT US

Managed Health Connections is transforming how substance use disorders are treated. Our flagship product, Appropos Health, can provide documented proof of reduced alcohol use. Further trials are underway with a path to FDA approval.
